CAREER OBJECTIVE

A challenging career opportunity in the field of web development that utilize my previous work experience, academic background and me. Seeking a suitable position that utilizes my computer, language skills, fulfills my personal ambition and enhances my knowledge.

Profile

I'm a junior front-end developer with experience in building and maintaining responsive websites. I'm working with HTML, HTML5, CSS3, JavaScript, EJS6, SASS, frameworks react js and bootstrap 5 library like jQuery, I worked with plugins like (OWI Carousel.js, Slick.js, Wow.js, AOS.js, and Skitter.js) I have knowledge of APIs, and Regular Expression.

Projects

E-Commerce Platform [🔗](#)

- Utilized Formik and Yup for form building and validation, and React Query for product data management.
- Integrated Slick Slider for responsive slideshows and React-Detect-Offline for online/offline detection.
- Implemented React-Hot-Toast to provide instant user interaction feedback, leading to a 30% increase in user satisfaction scores and a 20% reduction in error reporting

Social App

- Created a responsive social media platform using Next.js, TypeScript, Redux Toolkit, and Tailwind CSS. Implemented core features such as user profiles, post feeds, and real-time interactions. Applied modular code structure and followed best practices for scalable frontend development

Qurank [🔗](#)

- Utilized Axios for fetching movie data from the API and Utilized React Router Dom to travel between Component. Styled the application with CSS and Bootstrap, incorporating icons from FontAwesomes . this APP is designed to read or listen Al-Quran Al-Kareem.

Portfolio [🔗](#)

- Developed a responsive design using Bootstrap , Html , Css , Js and clean design . Utilized Bootstrap components and grid-system to ensure cross-device compatibility and a user experience .

Login System Smart [🔗](#)

- Utilized Regular Expressions to validate the input from user . Using LocalStorage and session storage to store data from user Styling by css and Bootstrap and grid-system to be responsive design and using JS in event and toggle

Crud Operation [🔗](#)

- Built a CRUD application using JavaScript , enabling users to create , read , update , delete records , Focused on intuitive UI/UX and efficient data handling , Utilized Regular Expression to detect data from user and JavaScript to detect the data is valid and none repeated and using LocalStorage to store data from user .
